SYSTEM 1 - OVERVIEW

ECO-CLEAN SOMALILAND CLEAN CITIES, HEALTHY COMMUNITIES

What the System is About

The Community Waste Management & Collection Scheduler is a digital platform designed to modernize waste disposal services in Somaliland. It connects households and businesses with waste collection agencies to ensure timely pickup and a cleaner environment.

Instead of relying on irregular schedules or manual payments, the system automates route scheduling, customer subscriptions, and collection tracking.

What the System Will Solve

- **Irregular Collections:** Eliminates uncertainty about when trash trucks will arrive.
- **Payment Disputes:** Digital tracking of monthly subscription fees prevents arguments over missed payments.
- **Missed Pickups:** Drivers have a clear schedule, ensuring no household is skipped.
- **Environmental Hazards:** Reduces piling up of garbage in streets due to delays.
- **Communication Gaps:** Provides a direct channel for residents to report complaints or missed collections.

SYSTEM 1 - DETAILS

What the System Will Include:

1. Login System:

- Admin, Driver, and Customer login.

2. Dashboard:

- Overview of total collections, pending pickups, and active subscriptions.

3. Customer Management:

- Register households/businesses and map their locations.

4. Collection Scheduler:

- Assign specific days and times for waste pickup in different neighborhoods (e.g., Jigjiga Yar, New Hargeisa).

5. Driver & Truck Module:

- Assign drivers to specific routes and track their completion status.

6. Live Status Updates:

- Status tracking: Scheduled → En Route → Collected.

7. Payments Module:

- Record Zaad/Edahab payments and generate digital receipts.

8. Complaint/Reporting System:

- Allow users to report uncollected waste or service issues.

9. Reports Module:

- Monthly revenue, collection efficiency, and customer growth reports.

System Purpose / Benefits

- Promotes a cleaner and healthier environment in Somaliland cities.
- Improves operational efficiency for waste management companies.
- Increases transparency in billing and service delivery.
- Reduces administrative workload through automation.
- Suitable for both private waste companies and municipal services.

Chosen Language: PHP (or Modern Web Stack)

SYSTEM 2 - OVERVIEW

HARGEISA EVENTS PRO

YOUR PERFECT EVENT, PLANNED PERFECTLY

What the System is About

The Hargeisa Event Planner & Venue Booking System is a centralized digital portal designed to streamline the planning of weddings, conferences, and corporate events in Somaliland.

Currently, booking a venue in Hargeisa requires physically visiting multiple hotels and halls.

This system allows users to check availability, compare prices, and book venues and vendors (decor, catering) from a single dashboard.

What the System Will Solve

- **Double Booking:** Prevents the common error of two events being booked for the same hall on the same night.
- **Time Consumption:** Eliminates the need to physically travel to 10+ venues to check availability.
- **Pricing Confusion:** Provides transparent pricing for halls, catering, and decoration packages.
- **Vendor Coordination:** Solves the difficulty of finding reliable photographers, decorators, and caterers by listing them in one place.
- **Record Keeping:** Digital records of all contracts and payments replace messy paper files.

SYSTEM 2 - DETAILS

What the System Will Include (Main Modules):

1. Login Page:

- Secure access for Admin, Venue Managers, and Customers.

2. Dashboard:

- Summary of upcoming events, recent bookings, and revenue.

3. Venue Management:

- List hotels/halls with photos, capacity, and amenities (AC, Parking, etc.).

4. Availability Calendar:

- Real-time view of booked and free dates to prevent conflicts.

5. Booking Management:

- Process reservation requests, approve/reject bookings, and set dates.

6. Vendor Directory:

- A section to list and book add-on services like Decorators, Cameramen, and Catering.

7. Customer Portal:

- Allows users to view their booking status and download invoices.

8. Payment & Billing:

- Track deposits and final payments; generate professional receipts.

9. Reports:

- Most popular venues, monthly income, and customer feedback analysis.

System Purpose / Benefits

- Digitizes the booming event industry in Hargeisa.
- Saves significant time and effort for families and event organizers.
- Maximizes revenue for venue owners by reducing idle dates.

- Provides a professional, organized way to manage contracts and payments.
- Reduces human error in scheduling high-stakes events like weddings.
